

Digital Licence

Teaching school-age children how to play, learn and socialise safely in the digital world

In a world that is increasingly connected, ensuring children have the digital know-how to be safe online is crucial. They need to be educated on when they might be putting their privacy at risk, and what to do if they are exposed to inappropriate content or encounter cyber bullying.

The eSmart Digital Licence delivers just that – Australia's #1 selling online safety education program teaches school-age children how to play, learn and socialise safely in the digital world.

It's the most comprehensive online education program available for children in Australia which helps teach school-aged children critical digital skills.

Created by the Alannah & Madeline Foundation together with cyber safety experts, teachers and psychologists, the eSmart Digital Licence is endorsed by the Office of the eSafety Commissioner.

It's aligned to the school curriculum, combining technical, ethical and behavioural lessons.

Delivered via a fun, interactive quiz, the eSmart Digital Licence addresses topics such as social media, online reputation and communication using real-life scenarios so that children are equipped to be smart, safe and responsible online. It also promotes discussion about online safety between young people and their parents or carers.

Online safety should be a regular topic of conversation at home and in school – children are much more likely to approach an adult if they run into trouble, which is the optimal outcome.

The eSmart Digital Licence has a junior primary, primary and secondary version, each comprising eight key digital topics.

When all eight topics are successfully completed, users receive an eSmart Digital Licence in recognition of being equipped with the necessary skills required to embrace and safely explore the wonderful world of online technology.

More than 260,000 students have registered for their eSmart Digital Licence.
